SUMMARY

Full-stack Web Dev driven by a desire to continually become a better programmer. Recently demonstrated motivation and exceptional time management skills by successfully balancing University of Washington Coding Boot Camp and full-time position at a Neuropsychiatric Treatment Center. Disciplined self-motivator who takes initiative and is eager to accept new responsibilities. Background in customer service industry and mental health field have contributed to strong customer focus and ability to thrive in a fast-paced environment. Experienced working with a development team to deploy web applications while determining checkpoints, resolving issues, and meeting deadlines.

TECHNICAL SKILLS

Front-end: HTML5, CSS3, Sass, Bootstrap, JavaScript ES6, jQuery, Express, APIs

Back-end: Node,js, mySQL, Sequelize ORM

Dev Tools & Web Technologies: Chrome Developers Tools, Github, Gitlab, Heroku, VS Code, WordPress

PROJECTS

Scrabble Dabble

A word scramble game designed to improve players' scrabble skills. Players spell as many words as they can in the time allowed using the letter tiles on the screen, earning more points for longer words.

Role: Applying CSS Framework, mobile-first responsive design, CSS styles, JavaScript functionality, debugging

Languages/Tools: HTML, CSS, Pure Framework, Meriam-Webster Dictionary API, JavaScript
